

The Process Analysis Paper

Whew, your grammar exam is over! Your second essay this semester is going to be about process analysis. For this essay, describe a process using either the directional or informational process analysis strategy. Your essay will need to be at least two and a half pages with an introductory paragraph, a minimum of three paragraphs in the body of the essay, and a conclusion. Please make sure you transition between ideas as you describe your process.

Make sure your paper is typed, titled, page numbers are inserted in the top right corner [lastname_pagenumber(we will go over this on Friday in the lab since there has been some confusion)], double spaced, and has one inch margins.

If you are submitting a rough draft to me, please submit your draft to my email by Monday November 2nd. I will not examine late drafts!

I understand there is a quick turnaround for this essay so we will be spending the next two Fridays in the computer lab exclusively working on your papers. Your papers will be due to my BCC email (wwend@bcc.edu) by midnight on November 6th. We will be in the computer lab that day to work on your papers.
